## INTRODUCTION

The California Department of Alcohol and Drug Programs is proud to present the Technical Assistance and Training Resource Directory, created to assist California agencies, organizations, community groups and individuals in identifying and utilizing technical assistance services (TA) and other information sources. In the following pages, you will find resources to help reduce and prevent problems associated with alcohol, tobacco, and other drugs (ATOD).

This directory consists of two general sections. The first contains a list of contractors funded by the California Department of Alcohol and Drug Programs (ADP) to provide ATOD technical assistance and training. The services provided under the ADP contracts are provided on a statewide basis free of charge. The contractors are listed by subject area. The contractors often have multiple areas of expertise and may be able to provide TA services in additional subject areas. It is recommended that you contact the organizations directly for specific information.

The second section, *Other Information Sources*, lists additional California-based resource centers, libraries and organizations that provide ATOD-related information and services. These organizations are not a part of ADP's TA contracts and may or may not charge a fee for their services. You may contact them directly for more information.

Every attempt has been made to make this directory as comprehensive, accurate, and current as possible. However, if you find an error, have a correction or addition, please complete the Directory Listing Change Form and mail or fax it to ADP at the address or fax number found on the form. Inclusion of a program in this directory does not imply an endorsement by the California Department of Alcohol and Drug Programs.
